

Mayor's Message

Dear Sunset City Residents,

A public hearing was held on June 18, 2013 and the fiscal year 2014 budgets were subsequently adopted. The City's total budget is \$4,189,199 and it is up \$276,000 from fiscal year 2013. We were able to give the employees a 2% cost of living increase this year. The North Davis Sewer District has had to increase its sewer rates \$1.00 again this year and the Council and I regret that we must pass the \$1.00 increase on to the citizens.

However, we were able to avoid a property tax increase.

It looks like our curbside recycling program has gotten off to a great start. Due to a scheduling problem the green waste recycling was not able to begin at the same time as the curbside recycling, but we expect this program to go smoothly, also. If you have opted out of these programs, I encourage your participation because grass contains a lot of water and green waste recycling will help keep the grass out of the burn plant to help it burn more efficiently, thus keeping our garbage fees down. Curbside recycling will help keep recyclables out of the land fill to help it have a longer, more useful life. Remember, once our landfill is full the garbage will have to be shipped out to another site and that will result in higher fees for future generations.

Another program that has just begun is a Better Landlord Program. By requiring landlords to screen their potential renters and keep their properties up to City Code standards, this program will help to keep crime down and beautify our neighborhoods.

I have spent many years discussing these programs and I am happy to see them finally come to fruition.

Sunset Fun Days will be held July 26th and 27th and I hope you look forward to attending this event.

As you may already know, I have chosen not to run in the upcoming Election. I thank those of you who have supported me in the last 3 ½ years. I, with the help of the Department Heads, have worked to secure over \$2.5 million in grants for projects that will help the community in the future.

As always, I thank all the citizens of Sunset who help make this city a better place to live.

Respectfully,

Mayor Bangerter

Municipal Primary Election

The Primary will be on **August 13, 2013** in the Sunset Room of the City Building. There will also be an early voting period, Monday through Friday 8:00 am to 5:00 pm during the two weeks of July 29 – August 2, in the City Offices.

Sunset City residents will be voting for the Mayor and two Council Member positions this year. Ending their terms are Mayor Bangerter, Council Member Andrews and Council Member Carlson.

Three residents have declared their candidacy for Mayor and six residents have declared their candidacy for Council as follows: Mayor – Kevin Snow (present Council Member), Ryan Furniss (present Council Member) and Beverly K. Macfarlane; Council – Raymond H. Chapman, Jr., Ricky Carlson (incumbent), Trystal Peay, Daniel Mathis, Chris R. Hadley and Brent Andrews (incumbent).

The regular Election will be held on November 5, 2013 in the Sunset Room of the City Building for all registered voters of Sunset.

As the candidates come around seeking your vote, please listen to them, ask questions and give them any comments or suggestions about the City you may have. Making an educated vote is very important to the community. Please make yours count!

A Few Words from the Police Department

The Sunset Police Department teaches DARE at the three Elementary Schools each year. No City money is used to fund this program. Some of our local businesses and the PTA of each school give money when they can and to further fund this program we hold an auction each year during Fun Days. Items auctioned are new or slightly used, but in good condition. This year the auction will be held on July 27, 2013 and start at 4:00 p.m. under the bowery at Central Park located at 85 West 1800 North. All items may be viewed during the day at the DARE booth. We will have a live auctioneer and will a lot of nice items to bid on. All the money raised will be used to purchase DARE workbooks and supplies, graduation certificates and T-shirts for each student.

Please come to the DARE Auction and support our elementary students and the DARE program.

Please be aware the Police Department is enforcing the Sunset City Weeds, Junk, and Abandoned vehicle ordinance and the all night parking ordinance.

WEEDS, JUNK AND ABANDONED VEHICLES, 4-4-1: UNLAWFUL ACTS:

- A. Existence Within City: It is unlawful to allow the growth of injurious and noxious weeds, garbage, refuse, unsightly objects or structures to exist on any yard, lot or piece of property within the city.
- B. Refrigerators: It is unlawful for any person to leave or permit to remain outside on any property in a place accessible to children any abandoned, unattended or discarded icebox, refrigerator or other container which has an airtight door or lid, snap lock or other locking device which may not be released from the inside, without first removing the door, lid or locking device.
- C. Abandoned Vehicles And Building Materials: It is unlawful for any person to cause, permit or allow scrap metal, wastepaper products, discarded building materials or any abandoned vehicle or vehicle parts, machinery or machinery parts or other waste material to be in or upon any yard, lot or piece of property within the city. For purposes of this chapter, a vehicle shall be prima facie presumed abandoned if such vehicle:
 - 1. Is not registered and inspected thirty (30) days after the date on which such registration and inspection is required by law; or
 - 2. Is wrecked, dismantled, partially dismantled or otherwise rendered inoperable for a period of more than one hundred twenty (120) days.
 - 3. Exceptions to subsections C1 and C2 of this section are recreational vehicles stored in a licensed recreational vehicle storage lot.
- D. Obstruction Of Sidewalks: It is unlawful to allow the obstruction of sidewalks resulting in the restriction of pedestrian traffic by:
 - 1. Allowing the growth of weeds, shrubs, trees or overhanging limbs to protrude onto or over the sidewalk.
 - 2. Leaving any garbage (other than for pickup), other objects, structures, materials or vehicles on the sidewalk or in the road or right of way.

6-1-3: ALL NIGHT PARKING REGULATIONS: No person shall park a vehicle on any street for a period of time longer than one hour between the hours of two o'clock (2:00) A.M. and seven o'clock (7:00) A.M. of any day, except physicians during emergency calls; and further provided, that any resident of the city may request permission for all night parking when the same is required by emergency or other unusual circumstances. The police department, for good cause shown, may grant such permission. The police department shall be the sole judge as to the necessity and requirements for the granting of such permission.

Message From the Fire Department

Home Fires

- In 2011, U.S. fire departments responded to 370,000 home structure fires. These fires caused 13,910 civilian injuries, 2,520 civilian deaths, \$6.9 billion in direct damage.
- On average, seven people die in U.S. home fires per day.
- Cooking is the leading cause home fires and home fire injuries, followed heating equipment. Smoking is a leading cause of civilian home fire deaths.
- Most fatal fires kill one or two people. In 2011, 12 home fires killed five or more people resulting in a total of 67 deaths.

Cooking

- U.S. Fire Departments responded to an estimated annual average of 156,600 cooking-related fires between 2007-2011, resulting in 400 civilian deaths, 5,080 civilian injuries and \$853 million in direct damage.
- Two of every five home fires start in the kitchen.
- Unattended cooking was a factor in 34% of reported home cooking fires.
- Two-thirds of home cooking fires started with ignition of food or other cooking materials.
- Ranges accounted for the 58% of home cooking fire incidents. Ovens accounted for 16%.
- Children under five face a higher risk of non-fire burns associated with cooking than being burned in a cooking fire.
- Microwave ovens are one of the leading home products associated with scald burn injuries not related to fires. Nearly half (44%) of the microwave oven injuries seen at emergency rooms in 2011 were scald burns.
- Clothing was the item first ignited in less than 1% of home cooking fires, but these incidents accounted for 16% of the cooking fire deaths

Public Works

There has been a little confusion this spring about water use restrictions. Weber Basin water has implemented a 20% restriction on all wholesale irrigation customers. This does not apply to Sunset City. We do not have secondary irrigation water and are a culinary (drinking water) customer only. However, it is everyone's responsibility to not waste this valuable resource.

Here are a few tips to help you use your water wisely.

- ✓ Check your swamp cooler for leaks.
- ✓ Wash only full loads of laundry or adjust your water level setting to reflect the size of the load.
- ✓ Become more familiar with your water bill so that you know how much water you are using.
- ✓ Repair leaky plumbing fixtures and appliances in your home.
- ✓ Show children how to use faucets properly.
- ✓ Locate the water shut off valve that is inside your home in case you have a pipe burst.
- ✓ Be aware! Listen for leaks.
- ✓ Landscape using drought tolerant plants. We do live in a desert State.
- ✓ Cover pools and spas to help reduce evaporation.
- ✓ Sweep driveways instead of washing the debris down the gutters.
- ✓ Adjust your lawn mower to leave your lawn a little taller. Longer grass helps shade itself requiring less water.

There are a lot more helpful hints at www.weberbasinwater.com.

We have adopted a new policy for dumping debris, branches and shrub trimmings at the Public Works facility. This service will only be available during the two months of April **and** October. We apologize for this reduction in service but felt that this change was in the best interest of Sunset City. We remind you that the neighborhood dumpster program is still in effect. You may contact the Public Works Department at 801-614-0014 if you have any questions or concerns.

Davis County Health Department

HEALTHY SWIMMING – TAKE ACTION

- Don't swim when you have diarrhea. You can spread germs in the water and make people sick. Don't swim for two weeks after diarrhea has stopped.
- Don't swallow water from pools, hot tubs, lakes, oceans, streams, ponds, or secondary water. Avoid getting water into your mouth.
- Practice good hygiene. Shower with soap before swimming and wash your hands after using the toilet or changing diapers. Also wash your hands after coming in contact with secondary water.

HEALTHY SWIMMING – PARENTS OF YOUNG CHILDREN

- Take your children on bathroom breaks or check diapers often. Waiting to hear "I have to go" may be too late.
- Change diapers in the bathroom or a diaper changing area. Not at the poolside. Germs can spread in and around the pool.
- Wash your child thoroughly (especially the rear end) with soap and water before they go swimming. Invisible amounts of fecal matter can end up in the pool.

For additional information, visit www.cdc.gov/healthywater/swimming

Davis County Library – North Branch

Summer Events Schedule – For more information call 801-825-6662

July 3	10:30 am & 1:30 pm	Storytime: Hands Can Dig

Antelope Island Stampede Festival!

The annual Antelope Island Stampede Festival

is a celebration of music, professional kite flying and performances, hot air balloons, BMX demos and stunts, paramotorists and so much more, including a variety of vendors in an incredibly unique setting, Antelope Island State Park. Come join us this Labor Day Weekend, August 30th – September 1st, for this spectacular, family fun event. More information is available at www.antelopeislandstampede.com or by calling 801-774-8200.

Davis County Walks 5K Run/Walk and Kids Mud Race

When: Saturday, Aug. 17

Run/Walk starts at 7:30am

Kids Mud Race starts at 9:00am

Where: Legacy Events Center, Farmington

Cost: Free for those 60 years of age and older; \$20 for pre-registered individuals 59 years and under; Free Kids Race (12 and under—pre-registration required)

Pre-Registration deadline:

Friday, Aug. 9

How to register: Pick up a form at Davis County Health Department or register online at www.daviscountyutah.gov/dcw

Questions? call 801-525-5050

Sunset City Fun Days

Friday, July 26th

6:00 pm	Carnival opens	Central Park
	Booths open	Central Park
	Baby Contest	Central Park Bowery (\$10 entry fee)
	Skate Contest	North Park (\$10 entry fee)
10:00 pm	Movie in the park "Despicable Me"	Central Park

Saturday, July 27th

6:00 am	5K Registration, start at 6:30 a.m. (entry fee \$15: includes t-shirt & breakfast voucher)	Central Park, west parking lot
7:00 - 9:00 am	Breakfast - (\$3 adults, \$2 under 12) (sponsored by Sunset LDS Stake and Smith's Food & Drug Store)	Central Park Bowery
10:00 am	Parade begins	On 250 W. from 2575 N. to 975 N.
	Vendor Booths open	Central Park
	Carnival opens	Central Park
10:00 am - 3:00 pm	Car Show	Central Park
2:00 pm	Mini-Tractor Pull	Central Park Tennis Court
4:00 pm	DARE Auction	Central Park Bowery
9:00 pm	Music	Central Park Stage
Dusk	Pirates of the Caribbean Performance	Central Park
Dark	FIREWORKS DISPLAY!	Central Park

Live bands will be playing – "The Polluters" and "Double Down"

Sunset City Water Quality Report

For the year 2012

We are pleased to provide you with this year's Annual Water Quality Report. We want to keep you informed about the excellent water and services we have delivered to you over the past year. Our goal is and always has been, to provide you with a safe and dependable supply of drinking water. The water we drink in Sunset is purchased from the Weber Basin Water Conservancy District.

Sunset City has a Drinking Water Source Protection Plan that is available for review to our customers at our city offices. It provides more information such as potential sources of contamination and our source protection areas. Our Sources have a low level of susceptibility from potential contamination from sources such as roads and residential areas.

We are pleased to report that our water is safe and meets federal and state requirements. If you have any questions about this report or concerning your water utility, please contact the Sunset City Public Works office at 801-614-0014. We want our valued customers to be informed about their water utility. If you would like to attend any of our regularly scheduled City Council meetings, they are held on every 1st and 3rd Tuesday of each month, 6:30 p.m., at the Sunset City offices, 200 West 1300 North, Sunset, Utah.

Sunset City routinely monitors for contaminants in our drinking water in accordance with the Federal and State laws. The following table shows the results of our monitoring for the period of January 1st to December 31st, 2012. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some contaminants. It's important to remember that the presence of these contaminants does not necessarily pose a health risk.

In the following tables you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms, we've provided the following definitions:

Detected Contaminant – Any contaminant detected at or above its minimum detection limit (MDL).

Minimum Detection Limit – The lowest level at which a particular contaminant is detected with a specific degree of certainty.

Maximum Contaminant Level (MCL) – The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminate Level Goal (MCLG) – The "goal" (MCLG) is the level of a contaminant in drinking water below which there is no known risk to health. MCLGs allow for a margin of safety.

Not Applicable (NA) – there is no Federal or State MCL and or MCLG

NTU – Nephelometric Turbidity Unit – a measure of the cloudiness of the water.

Non-Detects (ND) – laboratory analysis indicates that the contaminant is not present.

Parts per million (ppm) or Milligrams per liter (mg/l) – one part per million corresponds to one minute in two years, or a single penny in \$10,000.

Parts per billion (ppb) or Micrograms per liter (ug/l) – one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

Picocuries per liter (pCi/L) – picocuries per liter is a measure of radioactivity in water.

Sunset City purchases 100% of its water from the Weber Basin Water Conservancy District whose primary source of water comes from the Weber River Basin. The District has divided their culinary water supply into three separate distribution systems. These systems are Weber Basin NORTH, Weber Basin CENTRAL, and Weber Basin SOUTH. A copy of Weber Basin's Consumer Confidence /Water Quality Report can be obtained by contacting their office at 801 771 1677 or thru their website. Weberbasin.com.

The following table represents test results of Weber Basin CENTRAL, which supplies Sunset City with culinary drinking water.

Regulated Inorganic Contaminants

– This data is derived from samples collected from 2006 – 2012.

Contaminants (units)	Districts	Range		MCL	MCLG	Typical Source
	Average	Low	High			
Antimony (ppb)	0.6	ND	0.6	6	6	Discharge from petroleum refineries; ceramics, fire retardants, electronics
Arsenic (ppb)	0.6	ND	1.2	10	NA	Erosion of natural deposits Runoff from orchards
Barium (ppm)	0.15	0.08	0.26	2	2	Erosion of natural deposits
Fluoride (ppm) ¹	0.71	0.5	1.1	4	4	Discharge of drilling wells Fluoridated water in system
Nitrate (ppm)	0.5	0.12	1.6	10	10	Runoff from fertilizer use Erosion of natural deposits
Selenium (ppb)	1.1	0.6	2.1	50	50	Erosion of natural deposits; mines
Sodium (ppm)	32.0	13.9	61.5	NA ¹	NA	Erosion of natural deposits
Sulfate (ppm)	31.6	12	59	1,000 ²	NA	Erosion of natural deposits
Thallium (ppb)	0.6	ND	1.0	2	0.5	leaching from ore-processing sites; discharge from electronics, glass and drug factories
Total Dissolved Solids (ppm)	372	315	416	2,000 ²	NA	Erosion of natural deposits
	City Average	Low	High			Typical Source
Fluoride (ppm) ¹	0.649	.423	.787	4	4	Fluoridated water in system

Regulated Organic Contaminants – Disinfection Byproducts

This data is derived from samples collected in 2012.

Contaminants (units)	RAA ⁴	Range ³		MCL	MCLG	Typical Source
		Low	High			
Total Trihalomethanes (ppb)	35.9	13	60	80	NA	By-product of drinking water Chlorination
Halo acetic Acids (ppb)	21.6	9	38	60	NA	By product of drinking water Chlorination

Regulated Radiologic Chemicals – This data is derived from samples collected from 2006 through 2012.

Contaminants (units)	District	Range		MCL	MCLG	Typical Source
	Average	Low	High			
Gross Alpha Particles (pCi/L)	3.0	2.7	3.6	15	0	Erosion of natural deposits
Combined Radium (pCi/L)	0.7	.06	1.0	5	0	Erosion of natural deposits

¹ Fluoride levels in Davis County have been adjusted to an optimal level of 0.7.

² The MCLs for sulfate are established by the State of Utah.

³ Values in the “Range” columns are actual concentrations measured in ppb and reflect the range of detected levels.

⁴ This value represents the highest running average for 2012.

Regulated Microbiological Contaminants

Contaminants	Percentage	Average	High ⁵	MCL
Turbidity (Weber South WTP) ⁶	100%	0.03 NTU	0.11 NTU	0.3 NTU
Turbidity (Davis North WTP) ⁸	100%	0.04 NTU	0.12 NTU	0.3 NTU

We at Sunset City work hard to provide top quality water to every tap. We ask that all customers help us protect our water sources, which are the heart of our community, our way of life and our children's future. Please call our office if you have any questions. Sunset City Public Works: 801-614-0014.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Sunset City is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

All sources of drinking water are subject to potential contamination by constituents that are naturally occurring or man-made. Those constituents can be microbes, organic or inorganic chemicals, or radioactive materials. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice from their health care providers about drinking water. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Water Quality Inside Your Home

Sunset City delivers water that is cleaner than required by state and federal law. However, once water passes from our system and through the meter, you become a partner with us in making sure it stays that way. Here are some things to consider.

Water Heaters

Check the temperature setting for your water heater. Water that is too hot can create a burn hazard, while water that is too cool can create a perfect environment for bacteria to grow. You may also want to consider installing a pressure regulator to prevent any sudden surges to your water heater.

Filters and Purifiers

All types of filters and purifiers need to be properly maintained and monitored. Neglected devices may not work as intended. They can become a haven for microbial growth, or shed filter material into your home's tap water. Even the filter in your refrigerator needs to be maintained to protect your family.

Water Softeners

Since the hardness of your water can range anywhere from 1 to 12 grains per gallon, it is important to monitor the settings on your water softener regularly to make sure that you are treating your water properly. Over treating your water is wasted money, while under treating is not effective.

Unused Rooms

If you have a kitchen or bathroom that rarely gets used, you should make a point of running water through the faucets on a frequent basis. Stagnant pipes and fixtures are susceptible to microbial growth. Flushing unused water lines regularly will help prevent this.

⁵ This value represents the highest single measurement of combined filter readings taken every four hours during 2012.

⁶ This value represents the lowest monthly percentage of combined filter readings meeting less than 0.3 NTU in at least 95% of the measurements taken each month during 2012.
